DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5, and 7 recite the limitation "one of the transmission parameters of the connecting line or the connection" in lines 1, and 2. There is insufficient antecedent basis for this limitation in the claim.

Claims 5-7 depend on claim 1 which was cancelled.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 4, 5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,463,620 to Sriram, wherein claims 5-7 are assumed depending on claim 4. Sriram discloses an apparatus for statistical multiplexing of ATM with a plurality of virtual connections, which transmit ATM cell via a connection line, wherein connections are assigned to a first class (type 3), and second class (type 1) depending on a predetermined analysis using one of

transmission parameters (bandwidth) and the first class type 3 is subdivided into sub-classes (Col. 5, line 7-30; and col. 10, line 1-15).

Regarding to claim 7, Sriram discloses storing in the register 56 and table 58 a parameter of transmission parameter (bandwidth currently in used) and an analysis result (bandwidth available) wherein the parameters are updated through line 62 (Col. 9, line 3-24).
